ROOTBASE

S H O E S

S I S I al

Bagerst i kataloget finder du en oversigt over alle de materialer, komponenter og farver du kan vælge mellem. Katalog med skindprøver kan bestilles på sales@ortowear.com

At the end of this catalogue, you will find an overview of all available materials. Sample catalogues can be ordered at sales@ortowear.com

Am Ende dieses Kataloges finden Sie eine Übersicht aller verfügbaren Materialien. Weitere Katalog-exemplare können Sie gerne unter rootbase@leder-brinkmann.de bestellen.

LÆST / LAST / LEISTEN

Viser den anvendte læst til modellen. Vi anbefaler at man tager udgangspunkt i samme standard for at opnå et lignende design. De anvendte læster kan bestilles som træ læster, plastprøver eller STL-fil.

Shows the last used for the model. We recommend using the same last as a basis to achieve a similar design. Our lasts are available as wooden lasts, test shoes or as STL files.

Zeigt den für das Modell verwendeten Leisten an. Wir empfehlen, bei der Leistenkonstruktion den für dieses Modell eingesetzten Ausgangsleisten zu verwenden, um die Designeigenschaften des Schuhs größtmöglich zu übernehmen. Unsere Leistenformen stehen Ihnen als Holzleisten, als Probeschuh und STL-Datei zur Verfügung.

SKAFTEMATERIALE / UPPER MATERIAL / OBERMATERIAL

Vælg mellem +100 forskellige typer af skind og tekstil. Det er også muligt at sende skind/tekstil.

Choose between +100 types of leather and textiles. It is also possible for you to send leather and textiles.

Wählen Sie aus über 50 Varianten von Leder und Textilien aus.

RAND / WELT / RAHMEN

Vælg mellem +40 forskellige randtyper i skind eller EVA/ gummi.

Choose between +40 types of leather, rubber and EVA welts.

Wählen Sie aus mehr als 40 Varianten von Leder-, Gummi- und EVA-Rahmen aus.

MELLEMSÅL / MIDSOLE / ZWISCHENSOHLE

Mellemsålen kan enten være synlig eller skjules i skaftet/boarding. Vælg mellem EVA eller gummi i et udvalg af farver og hårdheder.

Midsoles can either be visible or hidden inside the upper or boarding. Choose between EVA or rubber in a range of colours and hardness.

Die Zwischensohle kann sichtbar oder unter dem Schaft bzw. der Verschalung verdeckt sein. Wählen Sie zwischen EVA oder Gummi aus einer Auswahl an Farben und Festigkeiten aus.

HÆGTER OG SNØRRINGER (SNØRREBÅND) / EYELETS AND HOOKS (LACES) / ÖSEN UND HAKEN (SENKEL)

Vælg mellem hæfter og snøringer eller en kombination af begge sammen med snørebånd.

Choose between eyelets and hooks or a combination of the two with laces.

Wählen Sie zwischen Ösen und Haken oder einer Kombination Beider mit Schuhsenkeln.

VELCRO / KLETT

Vælg mellem enkelt Velcro eller Velcro – Retur (Velcro med tilbageføring). Vi matcher bredde på Velcro-remme i forhold til model og læst. Har du specifikke behov kan disse beskrives.

Choose between single or return Velcro straps. We will match the width and number of straps based on the design. You are also welcome to specify what is required.

Wählen Sie zwischen einem geraden oder umgeschlagenen Klett. Wir passen die Breite und Anzahl automatisch an das Design an. Gerne setzen wir auch Ihre individuellen Wünsche um.

DERBY PUNKT / DERB POINT / DERBY-PUNKT

Derby punkt beregnes altid baseret på den specifikke læst for at sikre at pløsbåningen er stor nok til den individuelle fod. Hvis venstre og højre læst ikke er ens følger derby punktet den enkelte læst. Beregning af derby punkt er baseret på type.

Derby point is based on the specific last to ensure that the tongue opening is large enough for the individual foot. If the left and right lasts are not equally same size, the derby point follows the individual last. Calculation of derby point is based on type.

Der Derby-Punkt basier på dem spezifischen Leisten. So wird sichergestellt, dass der Einstieg groß genug für den individuellen Fuß ist. Wenn der linke und rechte Leisten unterschiedlich sind, folgt der Derby-Punkt dem jeweils individuellen Leisten. Die Berechnung des Derby-Punkts basier auf der Schuhart.

Vi arbejder med 3 typer:

Oxford: 0 mm Derby: -10 mm Sneaker: + 15 mm

We work with 3 types:

Oxford: 0 mm Derby: -10 mm Sneaker: + 15 mm

Wir arbeiten mit 3 Arten:

Oxford: 0 mm Derby: -10 mm Sneaker: + 15 mm

Derudover kan man manuelt markere punktet på læst.

Additionally you can manually set a mark on last

Zusätzlich können Sie manuell eine Markierung auf dem Leisten setzen.

LYNLÅS / ZIPPER / REISSVERSCHLUSS

Vælg mellem lynlås placeret på pløsen, medialt, lateralt eller på alle 3 positioner samtidig. Kan kombineres med alle andre lukningstyper.

Som udgangspunkt placeres alle lynlåse lodret. Læs mere i vores specifikationer som er tilgængelige som download.

Zippers can be positioned on the tongue, medial, lateral or in all three positions. Zippers can also be combined with other fastening types.

As a standard, zippers are always placed vertically. Read more in our specifications available for download.

Reißverschlüsse können auf der Zunge, innen oder außen eingebaut werden. Sie können auch zwei oder drei Positionen kombinieren. Auch die Kombination mit anderen Verschlussoptionen ist möglich.

Im Standard setzen wir den Reißverschluss immer vertikal ein. Für mehr Informationen greifen Sie bitte auf unsere ausführliche Anleitung online unter www.leder-brinkmann.de/rootbase zurück.

SKAFTHØJDE / UPPER HEIGHT / SCHAFTHÖHE

Skaftehøjden for skomodeller er altid defineret til læste-størrelse + 30 mm målt fra hælkrans (str. 42 vil dermed blive 42+30 = 72 mm). Læs mere i vores specifikationer som er tilgængelige som download. Skaftehøjde på støvle-modeller er angivet i mm målt fra bunden af produktionslæst/indlægssål.

The upper height on a shoe model is defined as last size + 30 mm measured from last edge. (Example for size 42: 42+30 = 72 mm). Read more in our specifications available for download.

Upper height on boot models are based on measures from the bottom on the production last/insole.

Die Schafthöhe bei Halbschuhen ist im Standard wie folgt definiert: Größe des Leistens + 30 mm, gemessen von der letzten Kante (Beispiel für Größe 42: Größe 42+30 mm = 72 mm).

Die Schafthöhe bei Stiefeletten oder Stiefeln wird von der Brandsohle aus gemessen. Für mehr Informationen greifen Sie bitte auf unsere ausführliche Anleitung online unter www.leder-brinkmann.de/rootbase zurück.

FOER / LINING / FUTTER

Vælg mellem +20 forskellige typer af skind og tekstil. Det er også muligt at sende foer til os.

Choose between +20 types of leathers and textiles. It is also possible for you to send linings.

Wählen Sie aus mehr als 20 Futtermaterialien aus Leder und Textil aus.

BOARDING / VERSCHALUNG

Boarding kan enten anvendes som en æstetisk del af sålen (converse type) eller som en forstærkning mod slitage. Boarding kan også kaldes galosering.

Har du læster med meget stor volumen eller som er meget høje i tåboksen er boarding en god løsning til at opnå et bedre udseende af fodtøjet.

Boarding can be used for both as a design element (converse type) or as reinforcement against wear.

If your lasts have a high toe box, boarding can help you hide the volume and improve the design.

Die Verschalung kann als Designelement (Conversedesign) oder als extra Schutz gegen Verschleiß verwendet werden.

Bei Schuhen mit einer hohen Vorderkappe kann eine Verschalung das Volumen kaschieren und sich somit positiv auf das Design auswirken.

YDERSÅL / OUTSOLE / LAUF SOHLE

Vælg mellem +100 ydersåler. Du er altid velkommen til at kontakte Ortowear for vejledning i såle-type i forhold til funktion, vægt og anvendelse..

Choose between +100 outsoles. You are always welcome to contact Ortowear for guidance related to sole types, functionality, weight and use.

Wählen Sie aus mehr als 100 Varianten von Laufsohlen aus. Wir beraten Sie sehr gerne zu Fragen verschiedener Typen, Funktionalitäten, Gewicht und Anwendung.

DIAL IN FASTNING

DIAL IN FASTNING er et fantastisk alternativ til Velcro. Det giver det samme ensartede hold om foden som et snørebånd, men kan betjenes med én hånd.

DIAL IN FASTNING kan placeres som en snøring (anbefales), på pløsen eller på hælen afhængigt af behovet for betjening/ funktion.

Snørebåndet i DIAL IN FASTNING består af en 49-tråds stålwire omsluttet af plastik. Den er derfor både fleksibel og holdbar.

DIAL IN FASTNING is a great alternative to Velcro. DIAL IN FASTNING provides the same uniform hold as laces but can be operated with one hand.

DIAL IN FASTNING can be placed on the side as an eyelet (recommended), on the tongue or on the back depending on the purpose.

The wire in DIAL IN FASTNING consists of 49 steel threads enclosed in plastic. This makes it both flexible and durable.

DIAL IN FASTNING ist eine großartige Verschlussmöglichkeiten für orthopädische Maßschuhe. DIAL IN FASTNING bietet einen gleichmäßigen und sicheren Halt, ebenso wie Schnürsenkel, kann aber mit einer Hand geschlossen und geöffnet werden. Es wird empfohlen das DIAL IN FASTNING Rad auf der Außenseite der Schuhe anzubringen. Je nach Bedarf kann dieses aber auch auf der Zunge oder der Ferse angebracht werden. Der DIAL IN FASTNING Draht besteht aus 49 Stahlfäden in einer Kunststoffhülle. Dadurch wird eine hohe Flexibilität und Haltbarkeit erreicht.

3D indlæg kan bestilles via OrtoLINK eller ved at sende skumkasser, blåaftryk eller 3D-filer til Ortowear.

3D indlæg printes i vores 3D printer eller CNC-fræses både fra top og bund for at sikre en høj og ensartet kvalitet.

Produktionstid: 2-4 dage.

Aflastningspunkter – lige hvor du har brug for dem

Inkludér plads i EVA-fræsningen og tilføj bløde aflastningspunkter i Ideal eller Plantec.

Mellemlag

Tilføj op til 6 mm blødt mellemlag i Poron.

Betræk – flere valgmuligheder

Vælg mellem MicroSmooth, MicroSuede, X-Static med flere.

Se vores udvalg af materialer og top-betræk i komponentlisten.

3D insoles are available via OrtoLINK or by sending a foam box, blueprint, or 3D files to Ortowear.

To ensure a high and uniform quality, 3D insoles are CNC-milled from both top and bottom.

Production time: 2-4 days.

Relief points – right where you need them

Include space in the milling of the EVA to add soft relief points in Ideal or Plantec.

Middle layer

Add a middle layer in Ideal or Plantec.

Top cover – a wide selection

Choose between MicroSmooth, MicroSuede, X-Static, and more.

Insole components can be reviewed in our list of materials and top covers.

3D Einlagen können über einen digitalen Scan, Trittschaum oder Blauabdruck an Leder Brinkmann geliefert werden.

Wir fräsen die Einlagen von Ober- und Unterseite, um eine gleichbleibend hohe Qualität zu garantieren.

Lieferzeit: ca. 2-4 Tage.

Druckentlastungen – punktgenau gesetzt

Vertiefungen in der gefrästen Einlage werden mit weichen Polsterstücken ausgefüllt.

Polsterschicht

Fügen Sie eine weiche Polsterschicht hinzu.

Bezugsstoffe – große Auswahl

Wählen Sie zwischen MicroSmooth, MicroSuede, X-Static u.v.m.

Eine Übersicht der Komponenten für 3D Einlagen finden Sie in der Komponentenliste.

Vil du formgive sålerne selv, eller skal vi hjælpe?

CAD Design er fantastisk til at modellere indlægssåler. Vi kan levere de færdige såler til dig inklusive formgivning, ellers tilbyder vi også CAD Design internt hos dig hvor vi lære dig at bruge det selv.

I CAD Design kan du oprette dine egne 3D-skabeloner til indlægssåler og øvrige elementer. Det strømliner og optimerer din forretning og dit data-grundlag.

Med CAD Design får du garanti for et pålideligt kvalitetsprodukt, tilpasset din produktion og arbejdsgange. Hurtigt, præcist og effektivt.

Do you want to model your own insoles, or should we help?

CAD Design is an amazing tool for modelling insoles. We can supply the complete insoles including modelling, we also offer CAD Design internally with you and provide training.

CAD Design enables you to create your own 3D templates for insoles and additional elements. This will streamline and optimize your business and your database.

CAD Design is your guarantee of a reliable quality product, adapted to your production and workflow. Fast, precise and efficient.

Möchten Sie Ihre eigenen Einlagen oder Leisten in 3D konstruieren, oder dürfen wir Ihnen dabei helfen?

CAD Design ist eine großartige Lösung für das Modellieren von u.a. Einlagen und Bettungen. Wir bieten Unterstützung bei Installation und Schulungen bis hin zur Fertigung und begleiten Sie bei Ihren ersten Versuchen in der neuen Umgebung.

Alternativ können wir nach Absprache die Modellierung für Sie übernehmen.

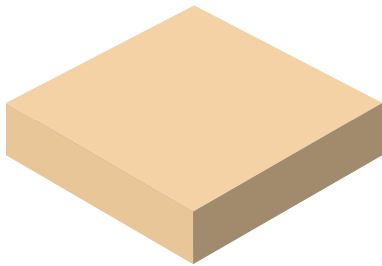

In CAD Design sind Sie der Chef: Sie richten sich Vorlagen, Standards, Module und Abläufe nach Ihren Vorstellungen ein, optimieren so Ihre Fertigung und machen Ihr Unternehmen zukunfts-sicher.

CAD Design ist Ihr Schlüssel für verlässliche Qualität – schnell, genau, effizient.

MicroSmooth / MicroSuede er et moderne mikrofiberstof, der føles som læder og er 100 % åndbart. Det transporterer fugt og varme væk, hvilket holder fødderne komfortable og tørre. Slidstærkt, antibakterielt og vaskbart ved 95 °C.

X-Static er strækbart, meget åndbart og fremragende i kombination med bløde materialer.

Fidel er et blødt betræk som har lignende egenskaber som et blød mellem-lag, men er mere holdbart så det kan bruges som betræk til indlæg.

MicroSmooth / MicroSuede is a modern microfiber fabric that feels like leather and is 100% breathable. It transports moisture and heat away, keeping the feet comfortable and dry.

X-Static is stretchy, highly breathable, and excellent in combination with soft materials.

Fidel is a soft cover with similar properties to a soft intermediate layer, but it is more durable, making it suitable as a cover for insoles.

MicroSmooth / MicroSuede ist die moderne Mikrofaser, die sich wie Leder anfühlt und dabei 100 % atmungsaktiv ist. Es nimmt die Feuchtigkeit und Wärme im Schuh auf und hält den Fuß angenehm trocken.

X-Static ist eine sehr gute elastische und atmungsaktive Kombination mit weichen Materialien.

Fidel ist ein weiches Deckmaterial, das Eigenschaften einer weichen Zwischenschicht teilt, jedoch eine höhere Haltbarkeit aufweist und sich somit ideal als Bezug für Einlegesohlen eignet.

Plastprøver kan 3D printes eller vakuumformes over læst, indlægssål og fiberbindsål i klar polypropylen. Herefter påsættes hæl i EVA i det aftalte spring.

Højde på skaftet tilpasses også i henhold til aftale.

Test shoes can be 3D printed or vacuum moulded on last, insole and fibre-sole in clear polypropylene. As a last step an EVA heel is added in the agreed heel gait.

Upper height is also cut according to agreement.

Sie haben die Wahl zwischen einem 3D-gedruckten oder klassisch tiefgezogenen Probeschuh. Der tiefgezogene Probeschuh wird über Ihren Bruttoleisten (Nettoleisten und Bettung) aus durchsichtigem Polypropylen tiefgezogen.

Wir bringen noch einen EVA-Absatz mit der gewünschten Sprengung an und schneiden den Schuh in der Schafthöhe ab.
